

SEÁN REDINGTON

Dublin (Relocated from Melbourne)

Hands-on product designer with 6+ years across **B2B and consumer products** for Fortune 500 companies, startups and agencies. Currently head of design and the only designer on a 15+ app portfolio, owning product direction alongside the craft, from research and discovery through to shipped UI.

WHAT I DO

End-to-end product design · Systems thinking · Research and discovery · Interaction and UI design · Prototyping and usability testing · Design systems · AI-powered product experiences · Product strategy and roadmap planning · Web and mobile

SELECTED WORK

AI English Tutor — Getmee AI

An AI-powered English learning system built for classroom use, validated through pilots across multiple geographies. 89% of 1,100+ students wanted it to continue in their curriculum.

White-label design system and deployment platform — Getmee AI

A design system and white-label infrastructure supporting 15+ apps, cutting new app deployment from weeks to 2 hours and enabling simultaneous feature releases across the full portfolio.

Registration revamp — CYGNVS

A rebuild of the registration experience for enterprise customers onboarding mid-incident, consolidating 65 fragmented paths into one. Failure rate fell from 50% to under 2% and new company sign-ups rose by 300%.

EXPERIENCE

Head of Product Design

May 2025 – Present

Getmee AI, Melbourne / Remote

Owned product and design strategy end to end as the only designer in the business, taking an AI learning platform from a single product to a portfolio of 15+ white-label apps, embedded with a 12-person engineering team.

Key achievements

- Doubled the userbase from 20,000 to 40,000 across 15+ white-label apps as the sole designer.
- Applied systems thinking to deliver AI-powered learning experiences, validated through classroom pilots across multiple geographies.
- Built the design system and white-label infrastructure the full portfolio runs on, cutting new app deployment from weeks to 2 hours.

Product direction and stakeholders

- Established a quarterly Product Council with the company's four largest customers, using it to surface their problems directly and shape the roadmap around what they actually needed.
- Met with customers and users weekly and presented product direction to the board, keeping decisions anchored to live feedback rather than assumption.

- Introduced product processes including UX office hours and Notion documentation, shifting the team from reactive delivery to roadmap-driven planning.
- Set product direction and priorities, working day to day inside a 12-person engineering team.

UX/UI Designer

Jan 2025 – Jun 2025 (Contract)

Marlin Communications, Melbourne

Short agency contract between SaaS roles, leading research and design for charity-sector clients.

- Led UX research and design of 3 high traffic websites in 6 months, keeping users' goals at the heart of decision making.
- Mentored a junior designer through research, critique and delivery.

UX Designer

Mar 2022 – May 2024

CYGNVS, Dublin

The senior designer across multiple teams in a cyber security start-up, trusted with the most complex and business-critical work as the product scaled.

Key achievements

- Spearheaded the design of a patented feature that uses an LLM to solve core customer problems.
- Played a critical role in roadmap planning and execution for teams across multiple geographies, aligning design and engineering priorities as the product scaled.

Scope and influence

- Worked across a number of product teams as the designer trusted with the most important and most difficult problems.
- Supported interviewing, onboarding and upskilling of designers, both on-site and off-site.
- Acted as a senior point of reference for designers earlier in their careers, through critique, pairing and day-to-day guidance.

Sr Associate UX Designer

Jan–Aug 2019 & Sep 2020 – Mar 2022

Workday, Dublin

Hired as an intern, rehired as a graduate and promoted to Senior Associate within a year, designing across web and mobile for Workday Help, the company's fastest selling product ever.

Key achievements

- Designed a profitable, well-received help desk feature within a large-scale enterprise platform.
- Ran usability studies and research to ensure impactful, user-backed features made it into the product.

Collaboration

- Organised workshops across the design team and wider scrum teams to align on priorities and quality.
- Embedded in an agile scrum team, working closely with product and engineering to ship on a regular cadence.

EDUCATION

BSc Product Design & Technology

Sep 2016 – May 2020

University of Limerick, Limerick
